Black Ice Software - July 24, 2013

Printer Drivers version 13.72 is released!
Improved PDF printing

The Black Ice Printer Drivers version 13.72 includes several improvements in **PDF printing.** The new release of Printer Driver includes improvements when printing PDF from Microsoft Office applications, such as **Microsoft Publisher.**

The new PDF printing also contains improvements for printing PDF from **Crystal Reports,** and includes several minor fixes in the color, position, scaling, rotation of the images and texts for the better **PDF output.**

The complete list of improvements in the latest Black Ice Printer Driver release includes the following:

- **Updated PDF SDK Dlls to 2.6.1.432 for the better PDF printing**
  - Stability improvement in PDF printing from Microsoft Publisher
  - Stability improvement in PDF printing from Dazzle printer
  - Improvements in PDF printing from Crystal Reports
  - Improvements in colors in the PDFs printed with 8bit grayscale or color
  - Improvements in color of monochrome image patterns used in the PDF
  - Improvements in drawing the width of the lines
  - Improvements in position and scaling of the clipping regions
  - Improvements in position, scaling, rotation of the images
  - Improvements in position, scaling, rotation of the texts

Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases of your software for free with your subscription! Priority email technical support is also included in your Subscription. For more information call us at +1 (603) 882-7711 Extension 2, or sales@blackice.com.

As a special offer, if your Maintenance Subscription has expired or you did not include the Maintenance Subscription in your original purchase, simply refer to this newsletter to renew or add Maintenance retroactively!
