Black Ice Software - March 30, 2016

Printer Driver version 14.56 is released!

Redesigned Text Output user interface, and dozens of new features!

Black Ice Software has released the Printer Driver version 14.56 with completely redesigned Text Output user interface.

The new user interface centralizes every text extraction relevant feature on the Text Output Tab of the Printer Driver Printing Preferences, allowing users to **configure the text output** and access every relevant feature **more quickly and easily** on a single Tab!
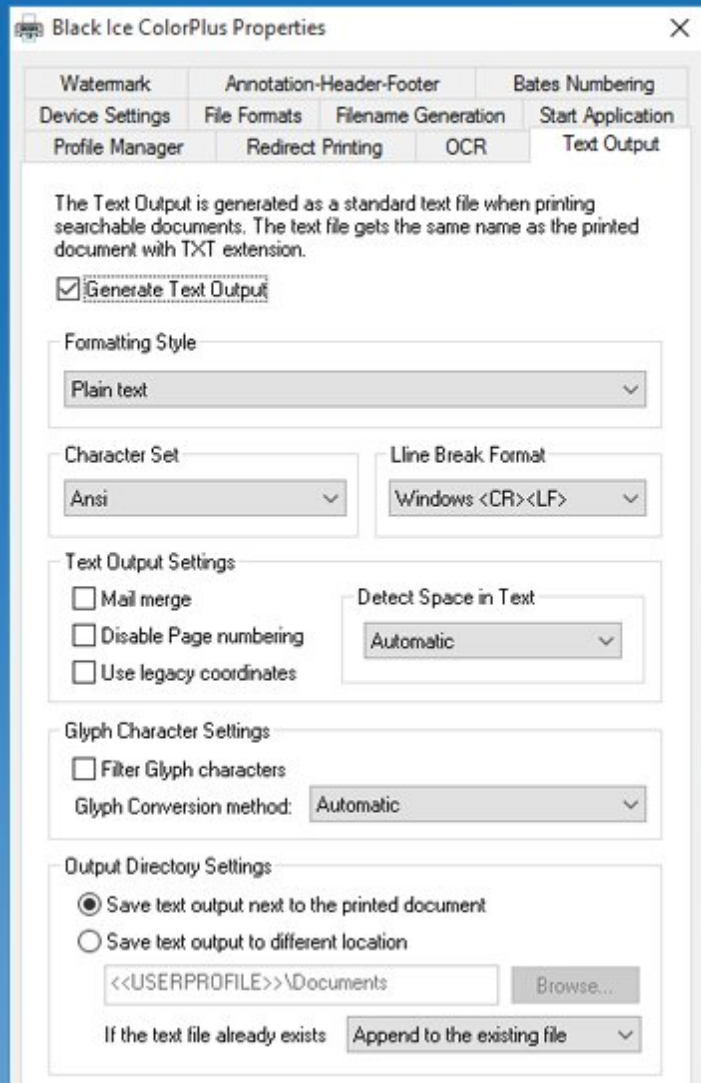

Beside the redesigned user interface, the Printer Driver 14.56 includes dozens of new features for the Text Output, including the followings:

- **Text with layout** - New formatting style to keep the original physical layout, indent, alignment and spacing.
- **Line break format** - To specify the format of the line breaks in the generated text output.
- **Output Directory Settings** - To specify different location for the generated text output files.
- **Automatic space detection and glyph conversion** options for improved text output.
- **New actions if the text output file is already exists** to append, overwrite the existing file, or to rename the new file and keep the already existing text output.
