Black Ice PDF Productivity: Top 3 Use Cases

Digital transformation can be a daunting journey, but it doesn't have to be. By going 100% digital with Black Ice PDF technology you can boost your bottom line and transform the success of your entire team. Here are the top 3 use cases for Black Ice PDF technology:

1. Streamline Productivity: With Black Ice's all-in-one converter that supports PDF, Tiff, JPEG, and HTML, you no longer have to use five different converters across various workgroups and teams. Your team can now **merge, split, password protect, email, add forms, OCR, and print** all documents with one virtual converter. This will streamline your workflows and boost productivity across your team.

2. Enhance Security: Outdated systems and technical complexities put your company and data at risk. But with Black Ice Printer Drivers, you no longer have to choose between usability and security. Our **HIPAA compliant solutions** include the ability to view and edit files in memory

using the [Tiff and PDF viewer](#). This ensures the security of your data while making it easily accessible to your team.

3. Reduce Waste: Going digital means expanding employee access to tools that allow them to stop using paper. The Black Ice Printer Driver not only removes the need to physically print documents, but it also has many document processing options that eliminate the time spent processing the documents. You can **upload** various **documents** right to a **document management system** or your **Web Server** application with just a **single click**. This will not only reduce waste but also enhance your team's efficiency.

In conclusion, Black Ice PDF technology offers you the perfect solution to your digital transformation journey. It streamlines your productivity, enhances your security, and reduces your waste. Don't let outdated systems and technical complexities hold you back. Upgrade to Black Ice PDF Productivity today and take your business to the next level.

A list of some recent improvements to the Printer Driver can be found below:

DATE : 02-01-2023
Version : 17.32 (revision: 2960)

- Stability improvement for the Merge Window in the TIFF/Monochrome printer drivers (#16187)
- Made some of the licensing related error messages clearer (error 35) (#15890)
- Stability improvement for starting the Print Spooler service after installing the Printer Driver using the MSI installers (#16173)
- Writing the Print Spooler status to the Printer Driver MSI installer logs at the end of installation (#16173)
- Updated eLicense.dll to version 6.34.310

Free Upgrades and Priority Support

Do not forget to subscribe to future releases by purchasing maintenance. With an active maintenance subscription, you will receive all new releases for free! Priority email technical support is also included in your subscription. For more information, call us at **+1 (561)-757-4107 Extension 3**, or sales@blackice.com.

As a special offer, if your maintenance subscription has expired or you did not include the maintenance subscription in your original purchase, simply refer to this newsletter to renew or add maintenance retroactively!

For license information, please visit our [Customer License Management Portal](#).

*Only valid for new purchases, no upgrades or add-ons. This offer cannot be combined with any other discounts.
